

M1151 Enhanced Armament Carrier

M1152 Enhanced Troop/Cargo/Shelter Carrier

The M1151/M1152 High Mobility Multi-Purpose Wheeled Vehicle (HMMWV) is an improved version of the standard HMMWV. The M1151/M1152 HMMWV has a heavier chassis and improved engine that enable the use of removable add-on armor protection that provides the Army greater flexibility when deploying units. M1151/M1152 provides the same level of protection as an UAH. The M1151 / M1152 HMMWV is a lightweight, high performance, four-wheel drive, air transportable and air droppable, family of tactical wheeled vehicles. The vehicle has a diesel engine, automatic transmission and payload capacity of a 2,300 lbs.

The M1151, replaced the M1114, is built on an Expanded Capacity Vehicle (ECV) Chassis which provides additional carrying capacity. The M1151 and the M1152 are fully capable of accepting an armor kit.

M1151 / M1152 Acquisition

AM General L.L.C., South Bend, Ind., was awarded on March 1, 2005, a contract to build M1151 and M1152 High Mobility Multipurpose Wheeled Vehicles. Work was performed at South Bend, Ind.
